OS, CSE SEM V

</div>

Help from the internet and man command can be taken. Screenshot of all the commands should be saved.

1. Discuss about 'sched_normal' scheduling algorithm used in CFS scheduling.

2. Explain the use of nice and renice commands.

3. Write a program (different from the program explained in the class) to show the use of nice(), getpriority() and setpriority() system calls.

4. Write a program to show the use of sched_get_priority_min() and sched_get_priority_max() system calls.

5. Write a program to show the use of sched_getscheduler() and sched_setscheduler() system calls.
